ABOUT US

With 30 years of knowledge and experience, the Doctor, who has given years to this sector, has a manager and operation team. Sante Istanbul, which brings together its staff in the field of health sector, hospital and engineering. It has a dynamic team that has received the necessary training and practice abroad. Sante Istanbul, which has an infrastructure dating back to the 1990s, has been privately owned since the beginning of the 2000s. He took his place among the founders of the sector with the increasing importance of hospital management in Turkey. In addition to hospital project design and project implementation areas, it also positions hospital management. Our group combines years of experience and state-of-the-art applications to ensure the perfect work of the projects it follows. It ensures that the outputs of the technology are taken. We make life easier for both our healthcare professionals and patients. Not only by establishing a concrete system or device or by creating a space, but also by. Based on our technical and theoretical knowledge, we also provide consultancy to you and contribute to your business with our ideas. Although the commercial life is about making a profit for some, Sante Istanbul is also on the face of its customers. It also works for the expression of satisfaction he wants to see

HOSPITAL PROJECT AND CONSULTANCY

Hospital consultancy and project design, by experts who have given years of this work, in every part of the hospital. The point is that the details of the point are considered by them for you and transferred to the project. Which hospital? What should be the type of wall paint in the department, what features should the ceiling and floors have, How should the heating, cooling and ventilation systems be structured, how many operating rooms should be in the hospital, and how many how the operating rooms should be designed, sterilization center details, the patient in the inpatient service rooms, design of intensive care services, arrangement of hospital entrance, information and halls and every detail you can think of is considered by us and hospital consultancy and project design presented to the authorities. Necessary negotiations and exchange of ideas on these ideas and projects are provided, changes are made if necessary, and after approval, the projects are again carried out by us. Implementation begins. In short; makes the project of your hospital, implements the project and finally When your hospital is ready for service, we hand over the key to you so that the hospital we are fulfilling our consultancy, project design and implementation tasks step by step.

OUR QUALITY POLICY

Sante Istanbul assesses the risks that will arise at all stages of the project process, including the investment decision-making process. The employer-determined constitution of the “job” in an understanding that will predetermine and govern it. Within the framework of a complete Project, from the preparation of contracts to testing and commissioning management. It provides management service with its expert team and domestic and international solution partners. Sante Istanbul works to turn big investments into big successes.
